Information Technology (Jul 2017)

### CAREER OBJECTIVE

Detail-oriented professional with 3.5+ years of experience and a proven knowledge of product development cycle and quality assurance. Aiming to leverage my skills to successfully fill the QA Engineer role at your company.

### EXPERIENCE

**QA Test Engineer**

*Practical SQA, Los Altos, CA / Dec 2020 - Present*

- Operate under Agile framework to complete releases every week and maintain well-organized sprints
- Develop testing programs that address areas such as database impacts, software scenarios, regression testing, negative testing, error or bug retests, or usability.
- Interact with developers and QA team members to clarify reported issues and assisted in determining the root of the problem
- Review software documentation to ensure technical accuracy, compliance, or completeness, or to mitigate risks.
- Create or maintain databases of known test defects.

**QA Engineer**

*Smule Inc, San Francisco, CA / Mar 2019 - Oct 2019*

- Created high-level QA Test Plans, Test Strategies, Test Cases based on tech specs for an aggressive release schedule
- Worked closely with other engineering teams in the office, as well as with offshore QA teams to resolve blockers and possible delays.
- Worked directly with the PM and Development departments in a fast-moving agile environment.
- Responsible for multiple iOS, Android and Web releases.
- Coordinated feature, full-regression, automation, alpha, and acceptance test runs with local and remote QA Engineers.
- Used - SaaS - testing integration of payment platform: Stripe, Fortumo, Braze.
- Hands-on experience in event analytics testing using SQL queries and MK Analytics.
- Hands-on working experience and proficiency of xCode, Android Studio, Charles Proxy, Jira, Jira Confluence, TeamCity, Test Rails, HockeyApp.

**Software QA Tester**

*Ubertesters Inc., New York City, NY / Feb 2017 - Dec 2018*

- Participated in weekly testing cycles, using functional testing approach, techniques and using experience from previous cycles to reproduce similar issues
- Wrote and optimized test cases to maximize success of manual software testing with consistent, thorough approaches
- Authored and maintained well-organized, efficient and successful manual test cases for entire team and helped other team members with "Reproducing the issue" and finding root problem to determine future steps to reproduce and cover future test cases
- Develop testing programs that address areas such as database impacts, software scenarios, regression testing, negative testing, error or bug retests, or usability.
- Document software defects, using a bug tracking system, and report defects to software developers.
- Monitor bug resolution efforts and track successes.
- Plan test schedules or strategies in accordance with project scope or delivery dates.

#### **Freelance Tester**

***Applause - Freelance, CA / Sep 2016 - Feb 2017***

- Performed exploratory and scripted functional testing on mobile and desktop applications using manual testing.
- Demonstrated methodical, detail oriented and thorough approach to all assignments while adhering to compressed timelines.
- Document software defects, using a bug tracking system, and report defects to software developers.
- Visit beta testing sites to evaluate software performance.
- Coordinate user or third party testing.

#### **Jr. Sound Engineer**

***Voice KZ - TV Show, Almaty, KZ / Jan 2012 - Dec 2014***

- Synchronized and equalize prerecorded dialogue, music, and sound effects with visual action of motion pictures or television productions, using control consoles.
- Recorded speech, music, and other sounds on recording media, using recording equipment.
- Regulated volume level and sound quality during recording sessions, using control consoles.
- Mixed and edited voices, music, and taped sound effects for live performances and for prerecorded events, using sound mixing boards.
